Expertise

- UI/UX
- MERN Stack
- MEAN Stack
- J query
- Arc GIS Server JavaScript API
- Chart Director
- Ajax
- Boot Strap
- Post-GIS
- PostgreSQL
- Geoserver
- Arc-py

Ballu Harish

Web-GIS / WEB Developer

Seeking an opportunity within a dynamic and challenging environment where I can leverage my extensive experience and skills in web development and GIS technologies to make meaningful contributions towards the success of the organization. With a strong foundation in both front-end and back-end web development, coupled with expertise in GIS tools and techniques, I aim to not only drive innovative solutions but also continuously enhance my personal skills. I am eager to collaborate with a team of talented professionals to create cutting-edge web applications and spatially enabled solutions that address complex challenges and propel the organization forward in its mission. Total industrial experience is 6+ years in Web GIS/ Web development environment .

Experience

2024 September -PRESENT

INCOIS PRAGATHINAGAR ,Hyderabad

Project Scientist

I have been working as a Project Scientist at INCOIS, focusing on web development. Currently, I am involved in the migration of an existing website from an older environment to a new, more efficient one. The previous setup included WebSphere as the web server, Oracle as the database, and ArcGIS Server for managing geospatial data. My task is to transition these components to a new infrastructure using Apache Tomcat and Apache HTTP Server for the web servers, MySQL for the database, and GeoServer for handling the geospatial data. Throughout this migration process, I have encountered several challenges and issues related to deprecated technologies. However, I have successfully addressed and resolved these issues through careful planning and execution. The migration has required a deep understanding of both the legacy system and the new technologies to ensure seamless functionality and minimal disruption. Additionally, I have focused on optimizing performance and ensuring compatibility across the various components involved.

2022 September - 2024 March

NRSC-ISRO BalaNagar ,Hyderabad

Research Scientist

During my tenure I Led front-end development of Bhuvan Panchayat portal using React JS, Bootstrap, jQuery, and Ajax for enhanced user experience. Managed server-side systems including Geoserver, Postgres, and Node.js to ensure seamless data delivery. Developed and maintained APIs, including GraphQL queries, to facilitate data access for various departments. Implemented Python scripts and Shell scripts for data processing tasks and server automation, enhancing system efficiency. Integrated extensive datasets and provided technical support, ensuring project success and reliability. Technologies used on front end are React JS, User Interface, Ajax, JQuery, Bootstrap. Technologies used on back end are Post-GIS ,Postgre-SQL, Geo-server, Python. Automation of services starting was an challenging task in backend and making the portal responsive was challenging task in front end.

2016 February- 2020 September

JNTUH , Hyderabad

GIS Developer

During my tenure from February 2, 2016, to September 2020, I spearheaded the "Exchange of Geospatial Data through Geo-web" project, aimed at accessing, displaying, and publishing Geospatial data. This involved accessing Geo-Spatial data from ESRI Arc-GIS server through services like Map service, Feature service, and Image service. I ensured detailed presentation of this data using service Popup Templates. Additionally, I facilitated the publishing of geospatial data onto the Arc-GIS server environment. Methodologically, I utilized websites to insert base maps and designed web pages using style-sheets and the Dojo Toolkit for event placement. I created a comprehensive Map view environment allowing viewing of Geo-Spatial data via various services and developed custom rendering tools for vector data customization. Furthermore, I implemented Query Tasks for providing vector data information using pop-up templates, placed widgets for easy access to Geo-Spatial data details, and provided various toggles for different spatial data views. Overall, my efforts contributed to efficient Geospatial data exchange and utilization throughout the project duration.

- Arc-Objects
- Open Layers
- Leaflet
- Map Server
- Python

2015 March - 2016 January **Avineon India Pvt Ltd, Hyderabad** **Assoc. Photogrammetry**

During my tenure at Avineon India Pvt. Ltd, I contributed to two significant projects. Firstly, for the Saudi Telecom Company, I utilized ArcGIS ,ERDAS Imagine to identify telecom tower-lacking areas in Saudi Arabia, aiding in strategic tower placement for enhanced communication infrastructure. Secondly, for IGN-France, I executed a pilot project utilizing MicroStation tools, TerraScan and TerraModeler, to compute bare ground surface, crucial for environmental assessment and planning. These projects showcased my proficiency in geospatial analysis, satellite imagery processing, and software utilization within diverse project scopes. Technologies used are ERDAS Imagine, Arc-GIS, Arc-py.

2013 November - 2014 November

INCOIS , Hyderabad

Project Intern

During my tenure at INCOIS, I led the development of an intranet application facilitating weather data sharing. Utilizing Java, I managed GTS data extraction and decryption, ensuring seamless processing. Employing SQL Server, I facilitated efficient data storage and retrieval. Additionally, I integrated Chart Director for dynamic chart generation and Open Layers for map visualization. This allowed users to access weather information graphically or download it in spreadsheet format. Running on Intel Pentium hardware with Windows 2007 OS, the application significantly enhanced weather data accessibility and analysis. Technologies used are Java, SQL server, Open Layers and Chart Director.

Certifications

- Certificate Program in React JS – IT-ITeS Sector Skills Council (NASSCOM), Issued Feb 2026, Credential ID: FSP/2026/2/10256080, Certificate: <https://inspiration-fun-7467.my.salesforce-sites.com/CDACcertificatePage2?id=a02Vy00000ueC2aIAE>
- RDBMS for Data Science – IT-ITeS Sector Skills Council (NASSCOM), Issued Feb 2026, Credential ID: FSP/2026/2/10256687, Certificate: <https://inspiration-fun-7467.my.salesforce-sites.com/CDACcertificatePage2?id=a02Vy00000vAtNNIAO>
- Full Stack Web Development MERN Certification Program – IT-ITeS Sector Skills Council (NASSCOM), Issued Feb 2026, Credential ID: FSP/2026/2/10256256
